

SUMIT KUMAR

PRODUCT OWNER / DIGITAL PRODUCTS / AI-BASED APPLICATIONS

CREATING CLARITY IN COMPLEX DIGITAL PRODUCT ENVIRONMENTS.

Product ownership grounded in requirements engineering,
technical systems and collaborative Agile delivery.

GLOBAL LENS

70+ COUNTRIES

Travel, cultures and curiosity across five continents.

AREAS OF STRENGTH

PRODUCT OWNERSHIP Prioritised backlogs, user stories and stakeholder alignment.	AGILE DELIVERY Structured collaboration with engineering teams, suppliers and testers.	AI & TECHNICAL DEPTH AI-based applications, embedded systems and software quality foundations.
---	--	--

A product portfolio built around structured delivery, clear communication and technical understanding.

BERLIN, GERMANY

PRODUCT. PEOPLE. TECHNOLOGY.

Technical products. Human alignment.

Product ownership that makes complex technical work easier to understand, prioritise and deliver.

01

FROM NEEDS TO BACKLOG
Translate business and user needs into product requirements, user stories and actionable priorities.

02

ALIGN DELIVERY
Work closely with engineering teams, suppliers and stakeholders to support transparent, coordinated decisions.

03

LEARN AND IMPROVE
Use testing outcomes, user feedback and stakeholder input to improve product decisions over time.

HOW I WORK

01

UNDERSTAND
Listen to users and stakeholders; clarify the problem and context.

02

SHAPE
Convert needs into requirements, user stories and clear priorities.

03

DELIVER
Coordinate teams and suppliers toward release-ready product work.

04

IMPROVE
Use test results and feedback to support informed next steps.

CORE EXPERTISE

Product Ownership	Agile Product Delivery	Requirements Engineering
Stakeholder Management	Backlog Prioritisation	Release Management
System Integration	Software Quality	AI-Based Applications

METHODS & WORKING TOOLS

WAYS OF WORKING
Scrum, Kanban, SAFe 6, requirements engineering, release planning and cross-functional delivery.

TOOLS
Jira, Confluence, Oracle APEX, MATLAB, Microsoft Office, CAN/ CANoe and software testing tools.

Evidence of contribution.

Selected highlights from professional roles and academic work. Product and client details are intentionally summarised to respect confidentiality.

01

AUTOMOTIVE SYSTEMS PRODUCT OWNERSHIP

CAPGEMINI ENGINEERING | WOLFSBURG | JAN 2023 - MAR 2025

SCOPE Supported the delivery of automotive software features aligned with stakeholder and user needs.

CONTRIBUTION Owned and prioritised product backlogs; translated needs into product requirements and user stories; collaborated with engineering teams, suppliers and stakeholders.

FOCUS Agile product delivery, stakeholder alignment, backlog management and feedback-driven improvement.

02

TRUCK TOLLING SYSTEM - TEST & ACCEPTANCE

TOLL COLLECT GMBH | BERLIN | DEC 2021 - JUN 2022

SCOPE Worked in test and acceptance management for the German truck tolling system (LKW-Maut).

CONTRIBUTION Supported automated testing and On-Board Unit (OBU) validation as part of software quality and acceptance activities.

FOCUS System integration, test coordination, quality assurance and release-readiness support in a critical mobility environment.

03

AI FOR VOICE AUTHENTICATION

M.SC. THESIS | TECHNISCHE UNIVERSITÄT CHEMNITZ | 2022

SCOPE Developed and evaluated AI models for speaker recognition and NLP-driven speech classification.

CONTRIBUTION Combined artificial intelligence, deep learning and speech analysis in a practical research project focused on voice authentication.

FOCUS Machine learning, NLP, model evaluation and technical communication across research and software contexts.

CONFIDENTIALITY NOTE Portfolio summaries are deliberately high-level and do not disclose proprietary project information.

Built in technical environments.

Experience spanning automotive systems, mobility infrastructure, embedded software and power electronics. Each role has strengthened a product mindset grounded in technology, quality and collaborative execution.

CAREER PATH

2023 - 2025	PRODUCT OWNER - AUTOMOTIVE SYSTEMS CAPGEMINI ENGINEERING WOLFSBURG Owned and prioritised product backlogs, translated stakeholder and user needs into requirements and user stories, and partnered with teams and suppliers on software feature delivery.
2021 - 2022	WORKING STUDENT - TEST & ACCEPTANCE MANAGEMENT TOLL COLLECT GMBH BERLIN Contributed to automated testing and OBU validation for Germany's truck tolling system, supporting system quality and acceptance activities.
2025	INTERNATIONAL PROJECT MANAGER - PROFESSIONAL DEVELOPMENT MYCAREERNOW GMBH Deepened practice in Product Ownership, requirements engineering, Agile delivery, stakeholder management and AI-enabled product development.

EARLY ENGINEERING FOUNDATION

2019 - 2020 E-MOBILITY & POWER ELECTRONICS INTERN Texas Instruments Deutschland GmbH	2018 SOFTWARE DEVELOPER INTERN AUDI AG	2017 EMBEDDED SOFTWARE ENGINEER INTERN Robert Bosch GmbH
--	--	--

THE COMMON THREAD	A strong technical base makes it easier to ask the right product questions, communicate with specialists and create delivery clarity across teams.
--------------------------	---

Prepared for product work that moves across disciplines.

Education, credentials and tools that support work across product, technology and delivery.

EDUCATION

2016 - 2022	M.SC. AUTOMOTIVE SOFTWARE ENGINEERING Technische Universität Chemnitz Specialisation: embedded automotive systems, ECU programming, CAN communication, software architecture, AI and deep learning.
2009 - 2013	B.E. INSTRUMENTATION TECHNOLOGY ENGINEERING M. S. Ramaiah Institute of Technology, Bangalore Engineering foundation with a focus on technical systems and applied problem solving.
